

Mrs. Couch Science NTID packet 3/25/2020

Day 1: visit the following website and tour all 5 locations. Write an 8 sentence paragraph describing your favorite location. Describe it and explain why it is your favorite.

Day 2: Get 5 of your favorite foods. Hold your nose and see if you can taste then with your nose held. Write a description of how the taste changed, and research why it changed. Your response should be at least 5 sentences long.

Day 3: For today you will need a shallow plate, water, pepper, and dish soap. Fill the shallow plate with about an inch of water. Sprinkle the pepper on top of the water. Stick your clean finger into the water and then describe what happens to the pepper on the surface of the water. Then dip your finger into the dish soap and then into the water. Describe what happened to the pepper this time. Research why this happened and write a short description. Also, explain why this knowledge is important for us right now.

Day 4: Fill a plastic bottle to the brim with water and put it in the freezer for at least 5 hour. Write a description of what happened to the water and to the bottle. Research why this happened and explain. Your answer should be at least 5 sentences long.

Day 5: Get outside! When you come back inside write at lease 5 sentences describing the wildlife or plants you saw while outside.
