

Miller Phase 2 Math Packet

All of my classes will be completing their work online using ALEKS. You need to work on your weekly goals of an hour and a half (90 minutes) and 5 topics. We can see who is working and who isn't. If you have work in Proximity that you didn't complete before all of this, then you also need to work on those assignments. If anyone cannot remember their ALEKS login information, then send Mrs. Wolf a message on Livegrades. If you do not have internet access, then you need to let us know so that we can get a paper copy of the packet to you.
