

6th and 7th Grade Math Support Alternate Zoom Assignments

Day 1: Before our Zoom meeting, be ready to tell me how you've been using math while we have been at home. How have you been using it in your daily lives?

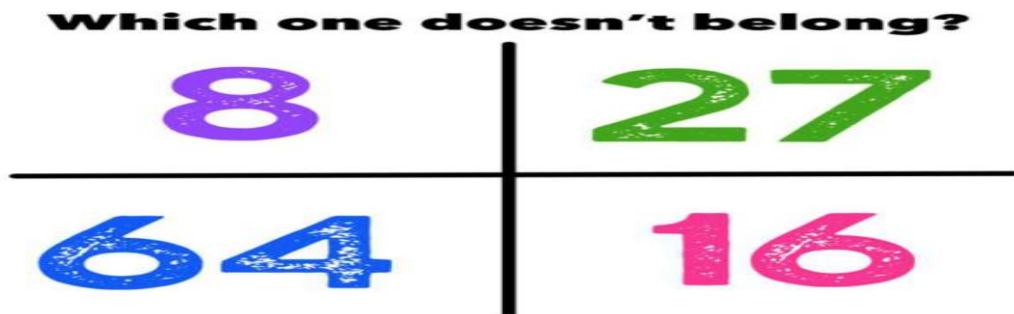

Day 2:

What is each of these worth and why? Explain how you solved it.

Day 3: Have you helped out any with cooking while you have been home? If so, then how have you used math while cooking? What kinds of skills do you have to use while cooking?

Day 4:

So, which number doesn't belong in this group? Remember that there could be multiple answers, so be prepared to explain your answer.

Day 5: What are some ideas that you all have for even more work if this continues for another few weeks or even month? If I have to create a phase 3 packet, then what all sorts of assignments would you like to have? Be ready to give me lots of ideas.
